

CAMEL Anywhere Solution

Enables seamless roaming in any partner network without the use of CAMEL technology.

Current Situation

In today's roaming market, connectivity and inter-working capabilities often stand in the way of enabling new global services or extending local services. One of the technological gaps is the complexity of offering subscribers a full range of IN services while roaming in non-CAMEL mobile networks.

The global advantage of CAMEL technology is that it affords a true seamless roaming experience. However, CAMEL technology is not always available in certain destinations, this could be due to technology limitations or because CAMEL agreements have not been signed between operators.

Starhome's Solution

The Starhome® CAMEL Anywhere™ solution is a highly flexible solution that enables mobile operators to provide a seamless roaming solution to their subscribers to enable them to roam in any roaming partner's network, without the use of CAMEL roaming technology.

Offering roaming subscribers the ability to use short codes, dial directly from the handset address book and enable other roaming VAS (such as VPN etc.) are part of a seamless roaming vision which is now practical using Starhome's CAMEL Anywhere solution.

CAMEL Anywhere utilizes a SIM-based applet alongside Starhome's IntelliGate platform. This winning combination allows seamless roaming to all subscribers in all destinations.

Benefits of Starhome's Solution

- Extends ability to offer IN services in any network
- Does not require CAMEL upgrades
- Operates seamlessly alongside existing CAMEL footprint
- Simple management of subscribers' roaming through black and white lists
- Simple provisioning of service and subscriber information

CAMEL Anywhere Solution

Key Features

- Complete call control, using a SIM-based applet on the roamer's SIM card
- SCP integration using IN protocols
- VPMN provisioning for service activation
- User friendly GUI for service provisioning
- Report generation counters
- Simple Network Management Protocol traps for service and system monitoring

Starhome

Starhome® is a global leader in providing innovative, market-driven roaming solutions. Since its establishment in 1999, the company has grown and matured into an industry-recognized authority on roaming solutions. Leveraging its accumulated roaming knowledge to zero in on market needs, Starhome provides operators with innovative and lucrative management tools, making it the driving force behind roaming profitability. We have developed a comprehensive range of products and services that work in synergy to target market opportunities, spanning the full spectrum of roaming industry needs. Our industry-intelligent solutions strengthen your competitive edge in the constantly changing mobile market. Starhome's product portfolio serves each major aspect of roaming:

Retail products stimulate and increase roaming traffic and usability. For **Wholesale** requirements we offer powerful solutions to enable you to meet your business targets and IOT discount agreements. Our **Network Operations** offering includes solutions to optimize network efficiency, improve quality of service, and reduce cost of ownership.

Our service portfolio includes real-time, integrative roaming management and innovation tools -- working in collaboration with our product portfolio - that provide analysis, forecasts, simulations and recommendations, along with a current worldwide visualization of your roaming business. System tools provide real-time access to the information you need to maximize your business goals and strategies.
