

# ROAMING VOICEMAIL TROMBONING TECHNOLOGY

## CHECK LIST

The EU deadline of July 1st, 2010 is just around the corner:

- Does your solution support all your roamer segments (prepaid, postpaid, VPN, Multi-SIM, etc.)?
- Is your solution independent of the VPMN type or vendor? Can you avoid integrating separately with each VPMN?
- Does your solution handle all your other service interactions correctly (Funtone, Home-zone, Missed Call Notification, etc.)? Does it support Conditional Call Forwarding?
- Do calls reach the voicemail system with all required information (MSISDN, CLI, forwarding information)?
- Does your solution support your network dynamics? Can it handle new services and new roamer segments without upgrades?

If you answered 'No' to one or more of these questions, you may not have the optimum solution required to meet the new regulation. Starhome can help you.

Starhome's solution addresses all these critical issues, and enables you to increase revenue, while fully complying with the regulation.
